

Project Milestone and Activity Planning:

Date	01 November 2022
Team ID	PNT2022TMID42619
Project Name	Project – Fertilizer recommendation system
Maximum Marks	4 Marks

Milestone:

The technology has grown wise and we can able to solve the problem in an easy way through this modern technology now a days.

In this web application, we can help farmers to identify the disease and how to treat the diseased leaves with the fertilizer and how much it needs to be treated. Machine learning technology algorithm is used to get the disease name. It can simply be done by uploading the captured image of the plant. Based crop yield disease prediction system, is helpful for formers of capturing the image at the plant and machine learning algorithm will give affected disease name. It can give both artificial and natural fertilizer in suggestion manner.

Activity List:

In Project Management Planning, an important task to scheduling the phrase of the project to the Team Member. It shows the various activity allocated and done by the members. In project we can split into four steps of phrases:

Phrase 1: Information Collection and requirement Analysis.

Phrase 2: Project planning and developing modules.

Phrase 3: Implementing the High Accuracy Deep Learning Algorithm to Perform.

Phrase 4: Deploying the Model on Cloud and Testing the Model and UI performance.
